

RUN INSTRUCTIONS:

Open your Apps Script project and go to Deploy > Test deployments. Choose Editor add-on and click done. With the Docs file you choose, go to the Extensions and choose our custom extension to run it. Use the tab section at the top to go between the different data structures.

Functionality Screenshots:

Updated UI:

- Changed the size of the dialog boxes so they are consistent
- Made the text more readable and visually appealing
- Synchronized all font sizing and font types
